

Ermidrà® Spray

Rehydrating Spray for Skin and Coat.
Ermidrà® Spray is ideal for dogs, cats and all pets that need skin moisturising.

Composition

- Zinc Gluconate normalises skin condition.
- *Epilobium angustifolium* extract, rich in astringent tannins, is known for its soothing, emollient and antibacterial properties.
- D-panthenol has an elasticising function and normalises the water content in skin and hair. It is found in all tissues and acts as a moisturizer on hair and skin. It enhances elasticity and helps to improve the structure of hair, giving long-lasting protection against dryness.
- Cyclodextrins: stabilizers and emulsifiers.
- Liposomes are moisturising micro-capsules that penetrate the deeper skin layers.
- Propylene glycol has a moisturising and keratolytic action.
- Glycerine has a moisturising and softening action.

Uses

- after treatment for dry skin conditions
- after treatment of atopic pets;
- in all situations of skin dryness (during the summer, or when confined to closed heated environments)
- after all types of shampooing, as helps to restore skin condition.
- to soothe itchy or red skin.

How to use

Shake well before use.

Apply the product abundantly over the entire coat until skin is damp. In the case of animals with a thick or long coat, spray against the hair.

Do not rinse or dry.

Use **Ermidrà®** spray several times during the day.
